OUR WORK

DAILYSENSE TEAM

Víctor Martínez

Front-End Developer

Rubén Perez Full-Stack Developer

Manel Barrado
Back-End Developer

Nestor LújanDocs & Idea Originator

Alejandro Giner SCRUM-master

VÍCTOR MARTÍNEZ

I love design,
Entrepreneur
&
Sushi

TIMELINE

DAILYSENSE WAS BUILT IN

IDEA

The creator of idea was Nestor Lújan, the idea came up in afternoon talking with his mother, remembering when they cared for their grandfather

DAILYSENSE BIRTH

The name of this project came up by Nestor Lújan but at the beggining we tought about CarefullNess

DEVELOPED USING THESE

REACT NATIVE

JAVA

MySQL

GITHUB

TRELLO

INTERFACES

When we were developing the application the first interface was completely deleted and redesigned, because our member Victor was not satisfied with its design, so he started again with the whole interface, that night he didn't sleep for a few hours.

MORE AND MORE PROBLEMS

We used REACT NATIVE and in many occasions we solved more errors than programming, it was a hard and very intense experience, since for the development of the application we had 2 weeks and a half, many sleepless nights.

THANKS FOR LISTENING

CURRENTLY

Currently the project continues to grow every day and now we will be able to have a chat and a web page with which we can interact freely.

FUTURE

When we started talking about the future of DailySense we realized that the application we were offering was much better than the competition and that the project could grow enormously in the future, so we decided to go for it.
